

Healed Realism Portfolio

What to look at

The photographs stay on the studio site so you can see them large. This sheet is the map to the healed realism portfolio.

Fresh and healed documentation is grouped by style: black and grey, fine line, color, cover-ups, sleeves, and portraits.

Start with healed photos in the style you want, not only fresh shots.

Who does this work

Joshua Cole is the studio lead and black-and-grey realism tattoo artist. His work includes portraits, large-scale sleeves, and cover-up and rework projects.

Teralyn is the studio fine-line tattoo artist: floral, script, and small detailed tattoos.

Katelyn Cole is the studio piercer: ear curation and anatomy-first placement.

Cover-ups

A cover-up consult looks at the old tattoo and at healed cover-ups in a similar size. The new piece has to be planned around what is already in the skin.
